

RESPONSIVE

WEBSITE DESIGN

25%

of internet users only access the internet via a mobile device

Is your website optimised effectively for all devices and platforms? Don't just think mobile or desktop, think every single device and user on the web. Responsive websites are designed to provide an optimal viewing experience across all platforms.

WHAT IS RESPONSIVE WEBSITE DESIGN?

Responsive web design refers to websites designed to adapted to whatever device a visitor is using

Responsive websites allow for easy reading and navigation with a minimum of resizing, panning and scrolling

Responsive sites have the ability to respond to any movement you make

ONE WEBSITE

Responsive design allows the same website to adapt to the screen they are on without compromising functionality or aesthetics
